RE: Completeness Determination for the Section 112(g) of the Clean Air Act Determination Request and the Prevention of Significant Deterioration and Title V Permit Applications

Dear Ms. Rogers:

The United States Environmental Protection Agency (EPA) received the Section 112(g) of the Clean Air Act (CAA) Determination Request and the Prevention of Significant Deterioration (PSD) and Title V permit applications for the Texas Gulf Terminals, Inc. (TGT) proposed project on July 13, 2018. The applications are for the offshore portion of the proposed crude oil export deepwater port project planned to be located in federal waters off the coastline of Brazoria County, Texas.

After our initial review of information submitted, we sent notifications that the applications were incomplete on August 10, 2018, August 27, 2018, and September 11, 2018 for the PSD, 112(g), and Title V applications, respectively. Based on our review of your responses and the supplemental information received from August 18, 2018 to September 4, 2019, we have determined that your applications are now complete. Even though we deem your applications complete, in the course of our review we may identify further information that will be essential to enable us to continue processing your application and make a permit decision. This may include additional information that is needed in order for us to respond to public comments.

If you have any questions, please feel free to contact me at (214) 665-6772, or Melanie Magee of my staff at (214) 665-7161.

Sincerely,

A handwritten signature in cursive script that reads "Cynthia J. Kaleri".
